

Additional GlossTek Testimonials

“We took the most beat up floor in our school, the art room for the 4th, 5th and 6th grade, stripped it and applied your coating, which took about one hour. This was on spring break. When school resumed, the art teacher opened her classroom door, looked at the floor and stopped her students from going in; she thought the floor was still wet. Well, now two months later, the floor still looks like it’s wet. It has held up to crayons, ink, glue, and many different paints. Our custodian in charge of this room only has to damp mop it to remove all stains. This alone has saved many hours of scrubbing. Thank you for showing us the way to better housekeeping.”

Custodial Supervisor, Huffman Independent School District

“The area covered is a Terrazzo tile hallway by the mall management office that takes heavy pedestrian and freight traffic. Also, two large mall stores were built with all the construction traffic through this hallway. The appearance of the floor is impressive, with very little wear, discoloration and high gloss retention. I have received many complements on this area... Daily dust mopping and scrubbing with an automatic ride-on scrubber equipped with brushes is the only maintenance performed on the floor.”

Operations Director, University Park Mall

“One of the biggest problems in healthcare is keeping floors looking good while patient census is running 80-90%. Well, that was a problem. GlossTek 100 has solved that problem for us. With your introduction of the product, my life at Oconee Memorial Hospital has been one of great pleasure. We just finished a nine-week facelift of patient rooms. With a new paint job and the application of GlossTek 100 on the floors, we look great. Nurses love the shine and the cleanliness. Patients have stopped complaining about dirty looking floors. GlossTek 100 is not hard to apply once you have rolled it on a few rooms. What I really like about it is that what you see the day you lay it is what you will see 12 months or longer from now.”

- Director of Environmental Services, Oconee Memorial Hospital

“I have been in this business since 1978 and have never been introduced to a product like GlossTek 100. I am fully convinced the use of this product will greatly reduce the cost of maintaining floors. I have seen the results of GlossTek100 personally in one of my hospitals. The floor which was treated with your finish over one (1) year ago, still looks as good as the day it was applied. This floor is in a high traffic area in which all supplies, equipment and materials entering the building must pass over this floor. I plan to continue until GlossTek 100 covers all my tiled floor spaces”

Regional Manager, DDE Army Medical Center

“We used your product in high traffic areas where we have problems maintaining a good appearance using conventional acrylic floor finishes. To date these areas have maintained their gloss and appearance with minimal maintenance other than spot mopping and occasional scrubbing. Using this product, we do not have to burnish floors to maintain the gloss, eliminating this process. We found your product can be aggressively scrubbed without impact to its gloss and is resistant to general purpose cleaners and disinfectants. We require less man-hours to maintain the floors with your product and eliminated the need to strip our floors and apply several coats of finish per year. Plus, it requires the application of a single coat of your product versus six coats of regular floor finish.”

Assistant Director Facilities, Indiana State University

“We have been applying your product on various types of substrates/surfaces for over six (6) years. These applications have been inspected on a regular basis and are currently performing well with excellent gloss retention and no signs of oxidation. We are pleased with the continued good performance of your product. Also, the environmental health and safety issues are very important to our company and we believe your products are the answer to these issues.”

President, Specialty Industrial Coatings Co.
