

# MODEL T, Jr.

---

## PRODUCT DESCRIPTION

The Model T, Jr., Foam Cleaning System is a rugged, portable, foam-generating unit. The system has been designed for operation on existing plant compressed air supply to clean processing plant equipment.

---

## BENEFITS

### **Enables Quick, Versatile Use Application**

- Compressed air is the only utility requirement
- Can be used with acid, alkaline or chlorinated liquid detergents
- Adjustable foam consistency

### **Saves Time and Labor**

- Portable for quick access to cleanup areas
- Simple, reliable construction requires minimal unit maintenance

### **Promotes Worker Safety**

- Exclusive internal pressure-loaded closure prevents pressurized tank from being opened
- ASME approved pressure tank and safety release valve

### **Long Equipment Life**

- Constructed of corrosion-resistant polymers and stainless steel
