

EXCELERATE™

CIP

PRODUCT DESCRIPTION

Exelerate™ CIP is a premium liquid, chlorinated detergent with a unique chlorine-stable surfactant that is formulated for circulation, spray and soak cleaning of dairy, food and beverage processing equipment.

Exelerate CIP is not for use as a hard surface sanitizer.

BENEFITS

Promotes Quality Assurance

- Enhances finished product quality and shelf life when used in a total Ecolab product and professional services program.
- Chlorinated formula attacks and removes protein soils.
- Non-corrosive to 304 and 316 stainless steel when used at the recommended concentrations.
- Prevents hard water precipitates leaving stainless steel bright and shiny.

Saves Labor and Time

- Built-in water conditioners, chelates, chlorine, and surfactants eliminate the need for installation and maintenance of additive pumps.
- Saves time – no mixing or dissolving required.
- Improved rinsibility over traditional chlorinated detergents leads to shorter rinse times and less rinse water.

Environmental Implications

- Reduces effluent impact: 1/2 the alkalinity and 1/3 less sodium than standard chlorinated alkalines.

Helps Reduce Cleaning Costs

- Better soil penetration from superior wetting agents.
- Longer chlorine stability at higher storage temperatures (>100°F) than standard chlorinated alkalines.
- Better hard water tolerance (>22 grains) than standard chlorinated alkalines.
