

ECOLAB® HI-TEMP TOOLS

Proper kitchen equipment cleaning and maintenance are key to improving food quality, extending equipment life and improving restaurant profits. Ecolab has developed an exciting new tool system to make kitchen equipment cleaning easier and safer.

Ecolab Hi-Temp Tools were designed to clean all surfaces, including hard-to-reach areas of fryers, ovens and other kitchen equipment. The multi-brush heads of the tool are easily removed for cleaning, replacement or hand-held use. The new tools are ergonomic, effective and easy to use, resulting in less time spent cleaning with better results.

Hi-Temp Pad Holder and Pads

Pad Holder- Item # 92212762
Pads- Item # 92212743

- Fitted pad works to remove build-up and is easily removed for replacement
- Flat surface makes cleaning easier, while the arched design maximizes tool contact on surfaces

Hi-Temp Detail Brush

Item # 92212765

- Designed to reach tight areas in fryers (gas or electric, LOV or traditional)
- Thin profile allows head to fit in between heating tubes and coils where soils accumulate

Hi-Temp Double-Sided Brush

Item # 92212764

- Wedge-shaped head fits well into corners and bristles help reach into crevices
- Top mounted bristles, combined with the angled head, help access hard-to-reach areas

Hi-Temp Handle

Item # 92212761

- 22.5" universal handle features a quick release mechanism for easy removal of the tool heads and hanging hook for convenient storage
- Ergonomic nonslip hand-stop and grip ball helps keep the user a safe distance from hot surfaces and liquids
