

## REACH SVHC Statement

Dear Supplier,

Ecolab imports your article (in the form of equipment, part or packaging) into Europe. If your article contains more than 0.1% w/w of a “Substance of Very High Concern”, we have a legal duty to communicate this to our customers. The list of SVHC is updated twice a year and published by the European Chemical Agency:

<https://echa.europa.eu/information-on-chemicals/candidate-list-substances-in-articles-table>

For us to meet this legal requirement, we need you to confirm the absence or presence of these substances in your article. We cannot use your article in the EU market before we have received the completed statement below.

Please note that the list gets updated regularly. If an update results in a change of the SVHC status of your article, we expect you inform us in a timely manner.

Thank you for your cooperation.

Yours sincerely

Yours Ecolab team

Please, select which statement applies for the articles supplied to ECOLAB.

A-We confirm that **none of the so called “Candidate List” Substances of Very High Concern (SVHCs) at >0.1% w/w or substances of Annex XIV (“Authorisation List”)(\*) are present** in the articles we supply to ECOLAB. In the future, we will inform you ([equipmentcompliance@nalco.com](mailto:equipmentcompliance@nalco.com)) in a timely manner of any articles supplied to Ecolab containing Candidate List substances.

(\*) The current Candidate List and Authorisation list can be found on the ECHA website :

<http://echa.europa.eu/web/guest/regulations/reach/candidate-list-substances-in-articles>

<http://echa.europa.eu/addressing-chemicals-of-concern/authorisation/recommendation-for-inclusion-in-the-authorisation-list/authorisation-list>)

B-We inform that the following articles (add new rows if necessary in the below table) contain “Candidate List” substances of Very High Concern (SVHCs):

Part number	Substance name	CAS or EC number(**)	concentration (% w/w) if >0.1% w/w	weight per unit article

(\*\*)CAS Number is a unique numerical identifiers assigned by the Chemical Abstracts Service to a chemical.

EC number is a unique seven-digit identifier that is assigned to chemical substances for regulatory purposes within the European Union by the regulatory authorities.

**Please return to your ECOLAB contact.**
