Note: For EHT-V specifications, see the EHT-V spec sheet.
Each time this door is lowered, standards are raised.

The EHT dishmachine delivers consistently spotless results through machine technology to help make your operations run more efficiently and at their best.

**Automated Procedures**
- EHT automatically dumps and refills the wash tank without interrupting your daily routine. The task is repeated at the correct time during the wash cycle, minimizing reliance on your machine operator.
- A push-button, end-of-day cleaning and delime cycle keeps your machine running efficiently, from day one to day 365.
- The tank is replenished at the correct time during the wash cycle, reducing reliance on your machine operator.
- The EHT machine automatically dumps and refills the wash tank without interrupting your daily routine. The task is repeated at the correct time during the wash cycle, minimizing reliance on your machine operator.
- The machine automatically adjusts the wash cycle based on the type of wares in the rack. SMARTCYCLE™ enables the optimal use of water and energy to achieve superior results.

**Insightful Data**
- The SMARTPOWER™ Controller monitors wash results and optimizes cycle parameters to reduce wash and labor costs.
- By combining powerful insights, innovative chemistry and personal service, SMARTCYCLE™ and EHT bring forth the highest level of clean.
- SMARTCYCLE™ ensures the optimal use of water and energy to achieve superior results.

**Innovative Chemistry**
- Proprietary chemistry enhances service to improve machine performance and results.
- EHT + SMARTPOWER™ + SMARTCYCLE™ optimizes your operation.
- SMARTCYCLE™ optimizes your operation.
- SMARTCYCLE™ optimizes your operation.
- The machine automatically adjusts the wash cycle based on the type of wares in the rack. SMARTCYCLE™ enables the optimal use of water or energy to achieve superior results.

**Customization lowers your total cost of operation.**

From upscale restaurants to everyday favorites, there is an EHT high-temp program that fits your needs. An EHT representative will help you choose the high-temp program that is right for your operation and budget. There are three ways to configure your dishwasher to suit most every need.

**EHT + SMARTPOWER™**
- SMARTPOWER™ optimizes your operation.
- SMARTCYCLE™ optimizes your operation.
- SMARTCYCLE™ optimizes your operation.

**EHT + SMARTPOWER™ + SMARTCYCLE™**
- SMARTPOWER™ optimizes your operation.
- SMARTCYCLE™ optimizes your operation.
- SMARTCYCLE™ optimizes your operation.

All three configurations are available with ventless operation (EHT-V). Ventless operation reduces hood vent requirements through the integration of heat recovery technology within the machine. The energy savings are substantial, and there is no need for a costly hood ventilation system.

Ventless operation makes high-temp warewashing economical.

- Ventless operation eliminates the need for a costly hood ventilation system.
- Cold water input optimizes energy savings and eliminates reliance on steam heat from water heater.
- Cold water input optimizes energy savings and eliminates reliance on steam heat from water heater.

**Expert service, personally delivered.**

With EHT, we deliver our warewashing power to lower your total cost of operation. The distinctive rental program offers many advantages, with service being at the top of the list. Expert responsibility is offered around the world, around the clock, any day of the year, with a Worldclass representative who is always here for you. We custom tailor our warewashing programs to the needs of our customers, no matter what the need may be.

Expert service, personally delivered.
