

Resiclean™

Teat Dip

A REVOLUTIONARY CLEAN FOR A NEW ERA OF UDDER HEALTH

For decades, teat dip technology has stood still while dairy operations moved forward. We changed that.

Resiclean™ teat dip, powered by PerformicPro™ Inside, redefines what clean can mean for udder health, delivering broad-spectrum protection that aids in reducing the spread of key mastitis-causing organisms, supports teat skin conditioning, and effectively disinfects — all in one solution.

This is more than an incremental improvement. It's a proactive approach to protecting what matters most: your herd, your milk quality and your bottom line.

A teat dip without compromise. Performance, protection and care, all in one.

Ultimate Udder Protection: Features & Benefits

Udder Health Results

Market trials show lower somatic cell count (SCC) and improved overall hygiene.

Breakthrough Germicidal Performance

Broad-spectrum protection aids against the spread of organisms which may cause mastitis with fast-acting disinfection in as little as 15 seconds.

Dedicated Mastitis Support on Farm

Resiclean is backed by Ecolab's team of mastitis specialists and on-farm support team.

Easy, Seamless Adoption

Two-part product with visible coverage that fits effortlessly into existing routines.

Excellent Skin Conditioning

Supports teat skin conditioning with 5% glycerin for improved hydration.

Residue-Friendly Chemistry

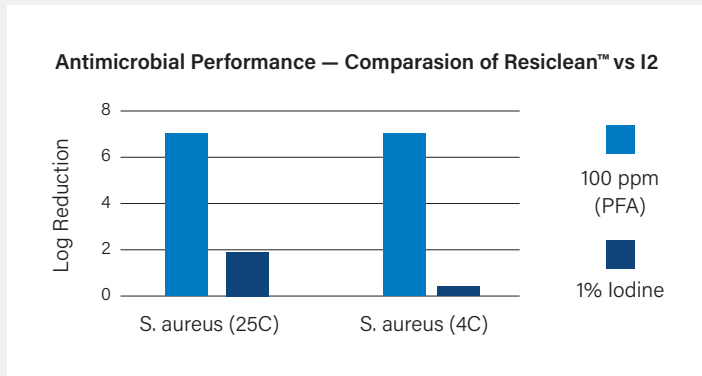

Breaks down into components already found in milk.

Results You Can See. Chemistry You Can Count On.

Breakthrough performance across the metrics that matter most: mastitis, SCC and teat condition.

Breakthrough Protection in a Blink

Resiclean™ delivers a rapid, reliable reduction of the spread of organisms which may cause mastitis across real-world conditions.

Maintains strong kill performance at low temperatures where iodine drops off.

OBSERVED EFFICACY

even with heavy milk load

MAINTAINS PERFORMANCE

even in cold conditions (4°C)

Effective disinfection in as little

AS 15 SECONDS

The Science Behind the Breakthrough

PerformicPro™ Inside is Ecolab's patented system built on performic acid, an advanced oxidative biocide that delivers broad-spectrum pathogen control with precision. It delivers the performance dairy producers are looking for in a streamlined solution.

Resiclean isn't just another teat dip.

**IT'S THE NEW STANDARD FOR
UDDER PROTECTION.**
