

# CONSISTENT TASTE. LESS WATER.

## Transform Business Results With Water Circularity Solutions

Optimize water-to-beverage ratios while protecting quality with integrated solutions that deliver total value across your plant.

### ENGINEERED FOR RESULTS

#### PRODUCT QUALITY & SAFETY

Consistent, repeatable taste  
Clean product changeovers  
Protected blend integrity

#### OPERATIONAL PERFORMANCE

Maximized line uptime  
Efficient heat transfer  
Reliable equipment performance

#### ENVIRONMENTAL IMPACT

Improved water use efficiency  
Enhanced effluent reuse  
Assured compliance

#### FINANCIAL IMPACT

Optimized total cost  
Quantified total  
value delivered

**ECOLAB**<sup>®</sup>

# A Proven Full Water-Cycle Approach

## WATER OPTIMIZATION THAT POWERS BEVERAGE PRODUCTION

Digital-first, modular programmatic solutions that work together to deliver performance results.

## ENGINEERED TO THE OUTCOME

Deep expertise, advanced technologies, front-end engineering and tailored equipment to deliver measurable results.

## CREATING A BLUEPRINT FOR BEST-IN-CLASS PERFORMANCE

Develop and activate pathways to optimize water interdependencies from unit application to the full water cycle across the operation.

## Achieve Circularity Outcomes with Modular Programs Tailored to Every Site

### Water Strategy + Advanced Digital Intelligence

Real-time insights and predictive control across the entire water cycle to identify value opportunities.

### Incoming Water Conditioning & Quality Assurance

Stable foundation of controls to protect product quality, process performance, and asset reliability.

### Process Hygiene & Water Quality Performance

Optimized hygiene practices to reduce contamination risk while maintaining quality, safety, and reliability.

### Thermal & Utility Water Performance

Scale, corrosion, and microbio control across boiler and cooling systems to optimize performance.

### Effluent Quality, Reuse & Compliance

Monitoring and mixing technologies to ensure stable effluent treatment and regulatory compliance.

### Water Reclamation & Chemical Recovery

Biological and membrane solutions for treating wastewater to lower costs and enable full-plant circularity.
