

CONVEYOR INSIGHTS

VISIBILITY. PRODUCTIVITY. SAVINGS.

Helping optimize conveyor throughput. Minimize waste and risk.

Conveyor Insights monitors conveyor lubricant usage and provides actionable insights that help reduce costs and improve worker safety.

Conveyor Insights helps improve:

COSTS

PRODUCTIVITY

ENVIRONMENTAL RESPONSIBILITY

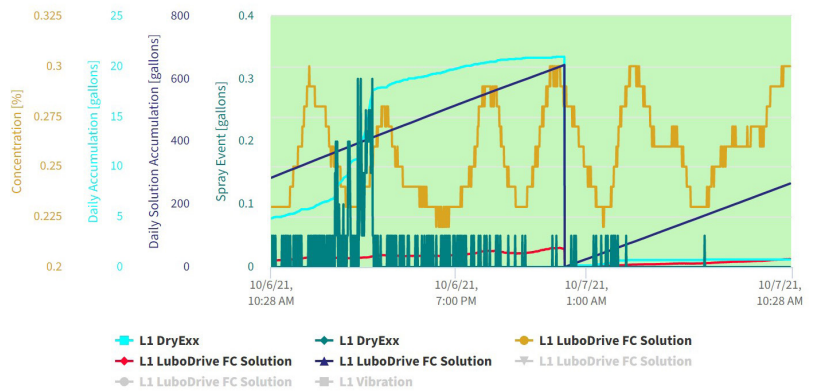

HUMAN HEALTH & SAFETY

WATER

Gain Actionable Insights

- **24/7 monitoring** provides you the insights you need to identify issues when they occur or see trends in improper lubricant use which might indicate leaking lines, broken nozzles, or training opportunities for specific teams.

Reduce Operating Costs & Drive Consistency

- **Continuous monitoring** and alerts notify sub-optimal lubricant usage which could represent leaking lines, broken nozzles, or other system issues.
- **Proper lubricant usage** results in water savings, helps avoid excess product costs, and reduces the rate of excess chemicals being passed to wastewater treatment plants.

Improve Worker Safety

- **Maintain cleaner conveyor lines** - Proper lubricant usage can help avoid excessive foaming or sticky conveyors which can lead to additional production and issues.
- **Accurate lubricant usage** helps avoid potential worker safety issues that can arise when lines experience excess foam and drips on the floor.

Easy Installation Means No Down-Time

- **System includes - at no cost to you -**
 - Ecolab Cloud for remote alerts and notifications.
 - Onsite Controller that monitors lube usage.
 - Sensors (vibration & flow) that pull lube usage data.
 - **No conveyor downtime required for installation.**
