## NOVEL CORONAVIRUS COVID-19 INFECTION PREVENTION MEASURES

On the 31 of December 2019, WHO was informed by Chinese authorities about several cases of pneumonia in Wuhan City, Hubei Province of China. The 7<sup>th</sup> of January 2020, **a new coronavirus was identified and named "COVID-19"**. Since then, numerous cases have appeared in different countries, and **human-to-human transmission has been proven**. Worldwide investigations are ongoing to learn more about this new virus.

Regarding **infection prevention measures**, standard precautions must be implemented in healthcare settings for all patients, all cares and by all healthcare workers. **In case of contact with a suspected or confirmed patient affected by the virus, extra precautions** must be implemented.

As infection control specialists, we support health care settings in implementing the infection prevention measures.
