

COVID-19 VACCINE RESPONSE

Ecolab Has Hygiene Solutions to Help Keep People and Environments Safe

Every step of the vaccine roll-out introduces new risks. That's why clients around the world trust Ecolab in the production stage of vaccines to help keep the environment free of contaminants. Additionally, hospitals globally trust Ecolab to be their provider of infection prevention products and programs to help improve healthcare hand hygiene and environmental hygiene. Now, we are able to use this expertise to help you better create safe environments for patients across a range of situations.

Our offer doesn't stop at cleaning chemistry, Ecolab uses a programmatic approach to help provide safe hygiene practices in locations all over the world. We have products, tools and people that can help you provide a clean and healthy environment for vaccination administration. We can also assist you in training and preparing your teams to execute a level of cleanliness that will help strengthen clinician and patient confidence.

HELP CREATE SAFER ENVIRONMENTS

Healthcare hand hygiene and surface disinfection

DECONTAMINATE THE SPACE

Hydrogen peroxide vapor technology to kill organisms on every exposed environmental surface

LEARN FROM OUR EXPERTS

Hygiene experts and local associates to deliver training programs for all employees of any experience level

We have experience supporting federal and state governments, agencies and healthcare systems in their mass distribution efforts to create clean environments.

HELP CREATE SAFER ENVIRONMENTS

Ecolab's hand hygiene and surface disinfection chemistries and programs optimize hygiene, and help give staff and those being vaccinated confidence that the threat of infection is reduced.

HAND HYGIENE

A wide range of hand sanitizers and soaps

SURFACE DISINFECTANTS

Disinfectant sprays for high-touch surfaces

SURFACE WIPES

Surface wipes for ease of use, with demonstrated material compatibility

Use biocides safely. Always read the label and product information before use

DECONTAMINATE THE SPACE

Automated decontamination systems and services to eliminate a minimum of 99.9999% of organisms (a 6-log sporicidal kill) from exposed environmental surfaces and optional semi-permanent rooms to help create a cleaner, flexible vaccine administration area.

SYSTEMS

A range of mobile decontamination systems for needs of varying size

SERVICE

A fully scalable bio-decontamination service with rapid deployment

BIOQUELL POD

Custom enclosure ideal for vaccine administration or individual patient management

LEARN FROM OUR EXPERTS

Help ensure the success of hygiene plans through our expert consultation and training program. Our team can help support you in providing a clean and healthy environment for vaccine administration.

IN-PERSON TRAINING

Local experts to assist in training your staff and help improve their understanding of hygiene protocols

VIRTUAL TRAINING

On-demand digital training resources to reinforce protocols and onboard new staff

ABOUT ECOLAB

A trusted partner at nearly three million customer locations, Ecolab is a St. Paul, MN-based global leader in hygiene, energy/water and food safety technologies and services that help protect people and vital resources. Ecolab has over 12,000 associates worldwide dedicated to creating cleaner, safer and healthier environments in healthcare and life sciences; from vaccine manufacturing to transportation, storage and administration.

Ecolab has the chemistry and clinical expertise to support a safe and efficient vaccine administration process. We help clean 40 billion hands, 15 million patient rooms and 3.5 billion surgical instruments annually, preventing the spread of HAIs and protecting patients.
