

GLOVING

ALWAYS WASH YOUR HANDS
PRIOR TO DONNING GLOVES
& **IMMEDIATELY**
AFTER REMOVAL

FUN FACTS

The use of
sterilized medical
gloves was first
implemented at
Johns Hopkins
in 1894.

The first disposable
latex medical gloves
were manufactured
in 1964.

The participants
of the Watergate
burglaries infamously
wore rubber surgical
gloves in an effort to
hide their fingerprints.

LITTLE ERRORS, BIG PROBLEMS

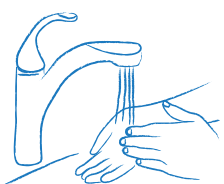

These simple mistakes can
end up contaminating
hands and clothing
70% of the time:

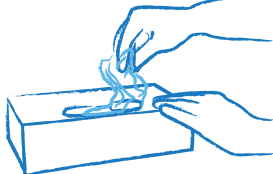

- > Forgetting to pull gloves over the wrist
- > Putting on gloves before putting on the gown
- > Removing gowns over the head
- > Touching the outside of a glove before removing it
