

CREATING A CLEAN ENVIRONMENT WHEN ADMINISTERING VACCINES

CLEAN AND DISINFECT FREQUENTLY TOUCHED SURFACES ON A REGULAR SCHEDULE:

Ensuring efficient cleaning between patients and thorough end of day cleaning is critical for reducing risk of infection.

MAKE TRAINING FOR HYGIENE PRACTICES EASY AND ON-DEMAND:

New and experienced staff alike need ongoing training for hand hygiene and environmental hygiene best practices.

PLAN FOR THE RIGHT QUANTITIES OF HAND SOAPS AND SANITIZERS:

Calculate the expected use of soaps and sanitizers based on the number of vaccinations and best practice for staff and patients use.

PLAN FOR THE RIGHT QUANTITIES OF HAND SOAPS AND SANITIZERS:

Calculate the expected use of soaps and sanitizers based on the number of vaccinations and best practice for staff and patients use.
