PROTECT YOUR RESIDENTS, EMPLOYEES AND REPUTATION

INFLUENZA: Combat the seasonal threat in your community.

- Influenza – often referred to as “flu” – is a virus that causes a common respiratory infection
- Influenza is easily passed from person to person via droplets produced when infected people cough, sneeze or talk
- Germs are brought into a community by residents, visitors and employees and spread when a person touches a contaminated surface

Protect your facility’s reputation and the health of your residents and employees with an Ecolab partnership.

Influenza can spread BEFORE and AFTER symptoms are present

**SYMPTOMS**

- Fever (usually high)
- Headache
- Extreme tiredness
- Dry cough
- Sore throat
- Runny or stuffy nose
- Muscle aches

**HOW INFLUENZA SPREADS**

**FLU IS SPREAD BY PEOPLE**

**FLU IS SPREAD BY DROPLETS**

MADE WHEN PEOPLE WITH FLU COUGH, SNEEZE OR TALK.

DROPLETS CAN BE SPREAD OVER A DISTANCE OF 3-4 FEET

**FLU IS SPREAD BY TOUCHING**

CONTAMINATED PEOPLE, OBJECTS OR SURFACES

**FLU VIRUSES ENTER THE BODY**

THROUGH YOUR NOSE, EYES AND MOUTH
**PREVENTION**

**TAKE ACTION**

- **Know your flu facts.**
  - Get access to educational & procedural information.
  - People with influenza should not prepare food or serve beverages for others until their symptoms have resolved.

- **FACT:** Patients are most infectious during the first three days of illness.

- **Frequent handwashing.**
  - Thoroughly wash hands & exposed portions of arms with soap & warm water for at least 20 seconds. Use designated handwashing sink.
  - Properly cover your mouth and nose with a tissue or sleeve when coughing or sneezing.

- **Sick? Stay home.**
  - Encourage people to: • Stay home • Get plenty of rest • Check with local health care provider as needed

- **GERMS ARE OFTEN SPREAD WHEN A PERSON TOUCHES SOMETHING THAT IS CONTAMINATED WITH THE VIRUS AND THEN TOUCHES HIS OR HER EYES, NOSE OR MOUTH**

**CLEAN THOROUGHLY & ROUTINELY**

- **CLEAN & SANITIZE**
  - Frequently touched surfaces with a properly registered disinfectant.
    - Light and air control switches
    - Faucets and toilet flush levers
    - TV and radio controls and telephones

- **DISINFECT**
  - All high touch point surfaces in the bathroom, including those exposed to urine, feces or areas where people cough and sneeze according to standard infection control procedures.

- **DISINFECT**
  - Door handles and push plates
  - Other surfaces as needed

**Learn more:** ecolab.com/flu-prevention
1. **Report** any suspected illnesses to management

2. **Follow** local public health guidelines for influenza

3. **Send home** infected individuals

4. **Stock** disinfectant products registered to be effective against influenza virus

5. **Clean & sanitize** following warewashing standards for contaminated ware

6. **Disinfect** “high-touch” surfaces with a product EPA-registered as effective against influenza virus

7. **Diligently practice** infection prevention, including washing hands frequently and use gloves when handling food
