

# The Future of 3D TRASAR™ Technology is Here

For 15 years, 3D TRASAR™ has been the unparalleled leader in water management technology, helping you minimize water use, maximize system performance and optimize operating costs.

Today's 3D TRASAR is smarter and more powerful than ever before. Our latest systems deliver important security, functional and advanced performance enhancements:

- Compatibility with ECOLAB3D™, our cloud-based platform that uses advanced algorithms & predictive analytics to help you manage your systems more effectively
- Preventive maintenance & support via our Total Care Service
- Enhanced data security backed by Azure Security Services from Microsoft®
- Advanced biocide feed including must-feed and ORP-differential technology to meet health & performance standards

Our subscription service offers digital connectivity for plant-level monitoring including System Assurance Center basic support. Today's 3D TRASAR systems are ECOLAB3D™ enabled, empowering you to upgrade for enhanced monitoring, visibility & control. Premium a la carte services like Water Safety Intelligence are also available.
