

Where Sustainability Meets Accountability

Water Flow Intelligence

Powered by **ECOLAB3D™**

Water Flow Intelligence leverages advanced technology to help you define and deliver on your sustainability goals. Expert monitoring identifies actionable alerts in real time, so you can quickly respond to maximize efficiency.

Turn your corporate sustainability goals into reality with insights gained through the Water Flow Intelligence digital service and partnership with Nalco Water representatives.

Real-Time Insights for Effective Water Management

Water Flow Intelligence powered by ECOLAB3D delivers data-driven insights to help you gain real-time visibility of your operations at the enterprise, site and asset levels. The service helps uncover water savings opportunities with:

**INDUSTRY-LEADING
EXPERTISE**

**ASSET PERFORMANCE
INSIGHTS**

**LEAK & FLOW
ANALYSIS**

With Water Flow Intelligence, you're empowered to make swift and strategic decisions to help achieve your sustainability goals and reduce your total cost of operation (TCO):

- Identify benchmarks to gauge efficiency across your enterprise
- Outline recommended actions to improve your water footprint
- Evaluate the impact of water-saving projects implemented throughout your organization

Real-World Value

Water Flow Intelligence offers the potential for significant return on investment in areas such as:

Productivity

Quantifies water use more efficiently, consistently and accurately than manual tracking methods

Assets

Provides targeted asset visibility to optimize system performance

Cost

Unlocks further cost savings opportunities from related reductions in energy, greenhouse gas emissions, utility and sewer bills, and more

How Water Flow Intelligence Works

Water Flow Intelligence provides the necessary data at your fingertips so you can manage your water and related resources with confidence.

AGGREGATES WATER-USE INPUTS IN REAL TIME, allowing you to focus on delivering strategic, sustainable outcomes

DRIVES SWIFT ACTION with enhanced alarming capabilities, managed 24/7/365 by engineers at Nalco Water's System Assurance Center

HELPS EVALUATE THE EFFECTIVENESS of your water management plan against enterprise and industry standards
