

MITIGATING COVID-19 RISKS

PROTECT YOUR STAFF AND YOUR PROCESSING FACILITY

The COVID-19 era presents many new risks and challenges for your food & beverage processing facility: protecting the health and safety of staff, keeping production lines aligned with fluctuating demand, and ensuring a safe, high-quality product amid global supply chain challenges. You now face the additional threat of shutdowns due to COVID-19 infections among staff – a reality experienced by many processing facilities.

Ecolab Pest Elimination is committed to helping you achieve the highest standards of food safety, facility safety, sanitation and public health. We provide a comprehensive range of strategic and proactive services, tools and expertise to help you create a safe, healthy and pest-free environment.

ECOLAB FOOD PROTECT PROGRAM FOR PROCESSING FACILITIES

Our Food Protect program is an integrated pest management program specifically developed to minimize pest risk, support audit-readiness and ensure food safety for the food processing industry.

ADDITIONAL SOLUTIONS TO HELP YOU STAY UP AND RUNNING

More than ever, you need to do all you can to reduce the risk of a shutdown from any issue. Ecolab Pest Elimination offers a broad spectrum of services to help you keep your facility up and running:

ECOLAB DISINFECTION SERVICES

Ecolab's uniquely designed, short contact time disinfectants have been rigorously tested and EPA-approved for specific surfaces. Reliable service performed by highly trained Service Specialists.

ECOLAB DIGITAL TOOLS

Ecolab provides sophisticated digital tools and dashboards to give you and your Ecolab Service Specialist visibility to your facility – even when there are restrictions to being onsite. Prioritize your biggest risks, see [recommended corrective actions](#), and use the [eLogbook](#) tool to automate documentation and support compliance.

ECOLAB PEST CLEAN OUT SERVICE

Ecolab's pest elimination experts provide focused clean out treatments to remedy established pest activity. This is particularly useful if your facility has been shut-down or operating at a limited capacity.

HELPING YOU MAKE THE MOST OF UNEXPECTED DOWNTIME

Shutdowns are an increasing reality in the COVID-19 era, and staff schedule fluctuations can further challenge facilities to complete required facility maintenance tasks. Ecolab Pest Elimination can help you fill those staffing gaps and use unexpected downtime to complete work that will help you get up and running faster – and help mitigate the risk of future shutdowns.

THE SHUTDOWN CHECKLIST

1 DEEP CLEAN YOUR FACILITY & SCHEDULE DISINFECTION SERVICES

Use downtime to complete all deep-cleaning protocols across your facility. This will help reduce both pest and food safety risks. Ecolab Service Specialists can help you identify specific problem areas or high-risk areas for targeted cleaning, and can also **provide disinfection services to help prepare your facility for the safe return of staff.**

2 COMPLETE STRUCTURAL REPAIRS

A shutdown presents an ideal time to **complete structural repairs to help mitigate pest and food safety risks in your facility.** Ecolab's digital dashboard highlights needed structural repairs, and your Ecolab Service Specialists can help you further identify structural issues that increase pest and food safety risks.

3 REDUCE EXTERIOR CLUTTER

Take a page from Ecolab's outside-in approach and don't forget about the exterior of your facility. **Use downtime to clear up vegetation, dispose of decommissioned equipment and reduce clutter.** These items make for great access points and harborage sites for rodents and other pests.

4 SCHEDULE PEST PREVENTION

Ecolab Pest Elimination provides a wide range of proactive pest services during downtime - **including spot treatments, installations of pest exclusion equipment and clean-outs.**

5 SCHEDULE FUMIGATION SERVICES

Schedule fumigation services during downtime to **further protect your facility from infestations.** Our industry leading expertise delivers unparalleled value by keeping your food safe and retaining its quality.
