

Fumigation Expertise for Log Export

To reduce pest transmission in raw wood products, log fumigation is required by countries to which the logs are being exported, with specific regulations differing by country. Ecolab understands these rules and how to apply the fumigant and process suited to protect your product.

Nationwide Coverage

We provide fumigation services at major seaports and inland locations across the U.S. We handle all processes, obtain all licenses and permits, and apply proprietary and cutting-edge technologies for pest-free results.

Regulatory Compliance

Whether your commodity is facing the quarantine regulations of imports or the foreign-country requirements of exports, Ecolab is fully registered, expertly trained, and uniquely experienced to provide compliant, effective fumigation.

ISPM Compliant Fumigation

Ecolab provides you with ISPM 15 certification for wood packaging material used in international trade. This is required to reduce the possibility for foreign pests to be introduced into new areas.

Committed to a Higher Standard

The most combined experience and training in the industry

Ongoing R&D investments and innovation driven by in-house experts

More effective pest programs and protocols

Clear, concise updates at every visit

Holistic approach and unwavering standards

Specialized Service. Experienced Professionals.

Ecolab has an extensive history of working with the USDA, state and local regulators to provide our customers efficient and timely fumigation services. Trust our experienced fumigators to manage the logistics of moving cargo, document and prepare all international paperwork, and maintain your schedule at ports throughout the U.S.

Containerized or Bulk Capabilities

No matter how you are moving your logs, we have your fumigation covered. Our flexible chambers allow us to create the most optimal size whether your logs are packed in containers or stacked on the ground.

On-Vessel Wood Chips

Our Master Fumigators understand the importance of providing a Fumigation Management Plan (FMP) that adheres to USDA requirements and port of destination regulations. They meet with the ship's captain and designated crew members to review their responsibilities in the FMP once the ship leaves port.

TRUST ECOLAB TO HELP YOU WIN THE FIGHT AGAINST PESTS

Ecolab goes beyond pest control, putting our expertise to work every day to solve the industry's most complex pest challenges. Through our proactive people and innovative spirit, we protect you today, while advancing new and better solutions to protect you tomorrow.

TRUSTED PARTNER

We forge partnerships that empower you to win the fight against pests

- › Consistent, reliable expertise and service
- › Customer care and technical support
- › Staff training on pest detection and prevention

INNOVATIVE SPIRIT

We continually advance the science of pest elimination and share our expert knowledge with you.

- › Proven, science-based protocols from our global RD&E Center
- › Industry leading educational resources
- › 140+ patents in pest elimination

SUPERIOR SOLUTIONS

We have a holistic approach and unwavering standards for proactive pest prevention and elimination

- › Highly trained Service Specialists
- › Targeted commercial programs to meet your unique needs
- › Guaranteed results for a pest-free environment

CONSISTENT COMMUNICATION

We keep you informed of pest issues so you can focus on your business

- › On-site consultation
- › Pest insights offer actionable information at your fingertips
- › Emergency response
